PROFILE

Computer Systems Engineer and fullstack software developer, passionate about continuous learning and solving complex technical challenges.

TECHNICAL SKILLS

- Java (Spring Boot)
- C# (.NET, ASP.NET)
- HTML & CSS
- PHP (Laravel)
- JavaScript (Vue, React, Svelte)
- Python (Django, FastAPI)
- Kotlin & React Native (mobile app development)
- CMS: WordPress, Shopify, Framer
- Figma (design interpretation)

SOFT SKILLS

- Teamwork
- Effective communication
- Problem solving
- Adaptability
- Proactivity
- Time management
- Continuous learning

LANGUAGES

English — Advanced conversational level (daily professional use).

Spanish — Native.

EDUCATION

Computer Systems Engineer
Universidad Virtual del Estado de Guanajuato

EDWIN CERVANTES

SOFTWARE DEVELOPER

PROFESSIONAL EXPERIENCE

Fullstack Developer — Sokolabs (2 years)

End-to-end development of websites using a variety of technologies, covering everything from conceptualization to implementation, with ongoing support to ensure optimal functionality.

Management of content management systems (CMS) such as WordPress, Shopify, WooCommerce and Framer, building themes and templates from scratch tailored to each project. Server and infrastructure administration to ensure robust and reliable operations.

Use of Figma to interpret designs and mockups, translating them accurately into functional, responsive interfaces and ensuring visual fidelity between design and final product.

Software Developer — Necodex/Bemisfit

2 years of experience developing software solutions in a nearshore work environment for international clients, collaborating on projects with distributed teams.

Consistent professional communication in English, both written and verbal, in daily meetings, technical documentation, and coordination with teams in the United States.

KEY COMPETENCIES

- Database design, management, and implementation.
- Multi-language software development, with particular expertise in C#, Java, PHP, and Python.
- Frontend development with HTML, CSS, and JavaScript using frameworks such as Vue, React, and Svelte.
- Network and server administration.
- Mobile app development with Kotlin and React Native.

ADDITIONAL TRAINING

- Video game development with engines such as Unreal Engine and Godot.
- Cybersecurity fundamentals — secure coding and application security best practices.
